Powered by EcoBurner

Creating **premium buffets** using **sustainable technologies**

2023 Catalogue

Eastern Tabletop have been known for supplying high quality products to the hospitality industry in the US for over 70 years. In this time, they have always been moving forward to offer their customers the most innovative buffet equipment. This had led to their most recent partnership with EcoBurner.

Although new to some US hotels, EcoBurner have been influencing changes to buffets around the world. Their premium product range gives venues serving buffet the opportunity to reduce their impact on our precious environment. EcoServe and EcoPan, powered by EcoBurner, eliminates the need for water at buffets, reduces carbon emissions by up to 75% and provides an alternative to single-use products like gels and wicks.

Eastern Tabletop chafing dishes can now be 'Powered by EcoBurner' to avail of these environmental benefits and ensure their buffets are sustainable into the future.

You can now choose to

Buffets Powered by EcoBurner

EcoBurner is a refillable burner that is placed under EcoServe, EcoPan or any chafing dish to keep food warm at buffets. Filled with EcoBurner fuel, it replaces single-use gels/wicks that have no place in modern hospitality.

Simply swap single-use gel or wicks for EcoBurner to improve the safety of your staff and the sustainability of your venue.

EcoBurner is the SAFER, CLEANER & GREENER alternative to single-use gels and wicks.

✓ Safer

- ✓ Always cool-to-touch.
- ✓ Switches off if overturned or overheated.
- ✓ No open chemicals near food.

✦ Cleaner

- ✓ No black smoky residue left on cookware.
- ✓ No toxic fumes – pleasant atmosphere for guests.
- ✓ No risk of fuel spills.

🌿 Greener

- ✓ Zero fuel waste- all fuel is used or remains safely in the EcoBurner until next service.
- ✓ Zero waste to landfill – EcoBurner is refillable and fuel cans are recyclable creating zero waste.
- ✓ Less carbon – up to 75% less carbon than gels or wicks.

“ EcoBurner Warming Tiles are completely WATERLESS and require NO ELECTRICITY so the HUB or ZOZZ can be easily set up anywhere!

St. Andrews Country Club, Florida

 Suitable for Outdoors

Windproof & Portable

- ✔ No electricity or cables required
- ✔ Warming tiles available to work with HUB & ZOZZ

EcoBurner is fully compatible with the Eastern HUB & ZOZZ systems

Choose a single or twin round or a GN warming tile to fit into the HUB or ZOZZ mobile buffet systems. These can be used with any other combination of tiles available from Eastern to create your ideal mobile buffet station.

Double Round Warming Tile
#EB11803GB

Single Round Warming Tile
#EB1804GB

GN Warming Tile
#EB1807GB

Modular - The EcoServe GN fits into the tile for use on the HUB or ZOZZ

Simply place lighting EcoBurners in the clips provided under the EcoTiles to create a truly mobile buffet system that requires no electric cables or costly batteries.

EcoTile Accessories

Non-stick aluminium and strengthened porcelain dishes for commercial use are available. These accessories compliment the HUB and ZOZZ systems to give chefs more premium presentation options. See page 32-37 for details.

GN Warming Tile with EcoServe GN, 2.6" Porcelain dish and Reinforced GN Glass Lid (Sold Separately).

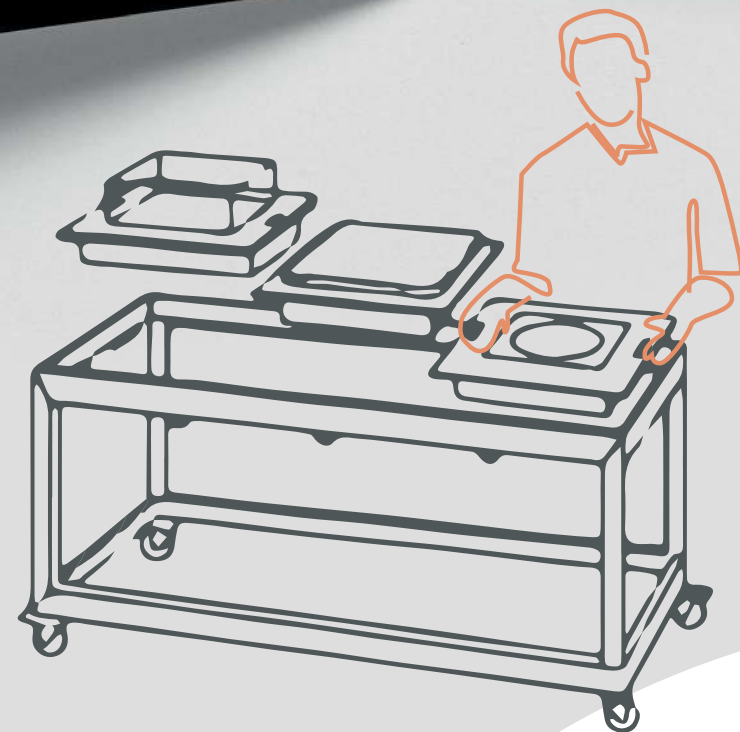

Twin Round Warming Tile with Round Aluminium Dishes and Glass Lids. (available separately, see page 36 & 37).

Design your Buffet to your Own Style

The EcoTile warming tiles can be mixed with any other Eastern tile to create your own buffet system according to your needs and style.

Now you can use Eastern Tabletop chafing dishes, Powered by EcoBurner instead of single-use gels or wicks. The high quality chafing dishes you know and love can now add to your sustainability goals too by reducing carbon and waste. Model numbers 3114, 3124 and 3144 can also be used with EcoPan to completely eliminate the need for water. (See page 20 & 21 for more details).

Go Waterless

Convert rectangle chafers to WATERLESS using the EcoPan. Simply remove the existing water pan and use EcoPan instead. Place an EcoBurner in the clips provided.

EcoPan

Go waterless with EcoPan and convert your existing chafer to the EcoBurner system.

If you're happy with your current buffet style and don't want to change your equipment, use EcoPan with your existing chafers to change to a waterless system. Simply swap the waterpan for EcoPan in any GN sized chafing dish and enjoy all the benefits of EcoServe:

-  **Waterless**
-  **Quick & Safe**
-  **Portable & Windproof**
-  **Flexible/Modular**

Each EcoPan saves 581 (US) Gallons of water every year if used instead of a waterpan.

EcoPan
#EB15330

Use two EcoBurners outdoors

Only one EcoBurner is needed for indoor buffet set-ups.

1. Use your existing food pan
2. Drop in NEW EcoPan
3. Combined with your existing chafer

EcoServe – The Waterless Chafing Dish Range

Benefits of EcoServe

Waterless

- ✓ No more filling, heating or wasting water.
- ✓ Better quality food as no steam or condensation from water pans.
- ✓ Saves water – one of earth's most precious resources.

Portable & Windproof

- ✓ Fully portable so buffet can be set up in any location indoors or outdoors.
- ✓ No electricity needed so no dangerous cables lying around.
- ✓ Ideal for outdoor dining as EcoBurner is windproof and can be set up anywhere.

Quick & Safe

- ✓ Heats up in less than 10 minutes.
- ✓ Simple, safer and slicker process for swapping out food dishes.
- ✓ No electricity or cables needed.

Flexible/Modular

- ✓ Buffet can be designed according to style or occupancy levels. Using more or less EcoServe units means that large scale resorts or small corporate events are all catered for with EcoServe.
- ✓ Hot or Cold options available – simply use an EcoServe Cool Pack to switch to cold service.

EcoServe GN

Designed to fit in with the architecture of commercial kitchens around the world.

Filling chafing dishes with water is both time-consuming and wasteful which doesn't suit the agenda of modern hotels seeking sustainable systems.

EcoServe is a waterless replacement to chafing dishes that is quick and easy to set up in any location which gives venues huge flexibility to create their own buffets according to location preference, style and occupancy levels.

Commercial kitchens around the world are often built around the standard GN sizing. EcoServe GN suits this universal size and will work well with any GN sized dishes giving chefs seeking premium presentations a more modern look.

EcoBurner as a heat source

Cool Pack for cold service

St. Andrews Country Club, Florida

The legs are easily folded in for space-saving storage. EcoServe GN measures 20" x 12" x 3" (LxWxH) when legs are folded.

Space-saving Storage

Space is often at a premium when it comes to storing buffet equipment, so we've designed the EcoServe GN with folding legs. This allows them to be stacked neatly for easy space-saving storage when not in use.

When stored away, 6 EcoServe GN's take up less space than 1 traditional chafing dish

Canonniers Beachcomber,
Mauritius

EcoServe GN is available to order in six colours

Buffet food deserves to be presented in the most elegant way and the EcoServe GN gives chefs this opportunity to showcase their creations for maximum impact.

It's innovative style and shape is unique; guests can see exactly what is available and chefs have complete autonomy to change the look of the buffet according to their own style.

Available in six colours with an option to add a reinforced glass lid which includes a soft close hinge that can be adjusted according to the height of the dish being used. It features an intelligent condensation recirculating system whereby any condensate is quickly captured, returned to the heat source and evaporated before build-up, giving guests a clear view of the delicious food on offer.

EcoServe GN Food Pans for HOT or COLD service

EcoBurner offer a selection of carefully chosen food pans to compliment the EcoServe GN look. The commercial-use porcelain dishes are available in a deep option, a platter and a divided dish for smaller portions.

The black non-stick aluminium dish offers chefs a more robust option that boasts exceptional durability and resistance to abrasion. All food pans can go directly from oven to buffet display ensuring the presentation is kept to a premium.

If dishes are being used for cold service, it is advised to chill the dishes prior to display to prolong the buffet presentation.

EcoServe Accessories

Single-Serve GN options for HOT or COLD display

The grab-n-go concept is here to stay. Offering individual portions at the buffet means the first guest experiences exactly the same as the last guest. Chef can dress each portion and presentation is kept consistent throughout service.

Serving individual portions not only minimises guests handling food, but also encourages guests to bring less food to their table, creating less food waste. Another step on the road to sustainable hospitality!

“ Single-serve dishes offer uniform presentation from the first guest to the last no matter when they attend the buffet.

Portion Control

Different size dishes allow for different amounts of food such as 8oz rice or 2oz salmon. Guests are less likely to over-indulge as they'll usually pick up single individual portions leading to less food waste overall.

Fresher Food

Dishes can be replenished on a first-in, first-out basis meaning no more food left in corners of dishes for too long.

No Cross-Contamination

No shared utensils reduces cross-contamination and guests can be confident that no one else has touched their food.

Glass lids

Glass lids are available in small and large to ensure food stays hot at the buffet while guests can still view what delicious food is on offer.

Pot Lid/ Spoon Rack

A convenient Pot Lid/ Spoon Rack is also available to provide guests with a place to rest lids and spoons used at the buffet.

Boost the efficiency of EcoBurner if not using EcoPan

EcoBoost Max

To maximise fuel efficiency, we recommend using the EcoBoost MAX. Simply attach an EcoBoost bracket to the bottom of any chafing dish so that it brings the EcoBurner closer to the dish and creates a windproof heat chamber that disperses the heat more effectively. EcoBoost reduces the amount of fuel needed to keep food warm and enhances the wind proofing benefits so is ideal for outdoor use in any catering situation.

EcoBoost MAX
#EB11133

“ EcoBoost reduces the amount of fuel needed to keep food warm and enhances the wind proofing benefits so is ideal for outdoor use in any catering situation.

EcoBoost MINI

Some hotels simply can't attach the EcoBoost MAX to their chafing dishes so the MINI will do as an alternative in these cases, but we do recommend using EcoBoost MAX as it will be more efficient.

The EcoBoost MINI clips onto the top of the EcoBurner to prevent heat being deflected back onto the EcoBurner to improve efficiency and is an easy way to start using the EcoBurner under any chafing dish.

Savings

When hotels and banqueting facilities switch to the EcoBurner system instead of gels or wicks, there are numerous savings to be made but the savings in **WATER, WASTE, CARBON** and **STAFF HOURS** are especially significant.

We've taken an example of a hotel using 20 chafing dishes, twice a day, for 3 hours each service, and calculated what savings that hotel would make if they switched to EcoBurner.

TYPICAL SAVINGS OVER A YEAR

Key Assumptions for calculations

WATER
11,600 gallons (US)

WASTE
1.72 US Tons

CARBON
6.6 US Tons

STAFF HOURS
1,947 hrs.

Student Hotel, Amsterdam

Zero Water

By eliminating the need for water at the buffet, hotels benefit from:

- ✓ Reduced WATER usage.
- ✓ Reduced risk of injury from handling water.
- ✓ Reduced staff hours handling water.
- ✓ Reduced energy usage from not having to heat up water.

TYPICAL HOTEL SAVING

Key Assumptions for calculations

Each traditional chafing dish uses approximately 0.265 US Gal of water for every hour of use. If in use for 3 hours, twice a day, that's 1.59 gal (US) per day.

Multiply by 365 days a year
=580 gal (US)

Multiply by 20 chafing dishes
=11,600 gal (US)

X

X

11,600 Gal (US) water saved annually

Tamassa, Mauritius

Zero Waste

By switching to EcoBurner, hotels can reduce waste in a number of ways:

- ✓ Reduced fuel waste – every drop of EcoBurner fuel is used unlike gels/wicks that are generally disposed of with left-over fuel remaining at the end of every service.
- ✓ Reduced packaging waste – Each can of EcoBurner fuel is the equivalent of 18 cans of gels/wicks.
- ✓ Recyclable packaging – EcoBurner fuel cans are fully recyclable!

1 EcoBurner Fuel Can
= 18 (2-hour) gel pots

TYPICAL HOTEL SAVING

Key Assumptions for calculations

6hrs per day x20 chafing dishes = 120 hrs per day = 43,800 hrs. per year	Divide by 0.7 (Typically there is 30% gel/wick fuel wasted after every service) = 62,571 hrs. per year	Divide by 2 (2-hour gel) = 31,286 gel/wick pots used	Multiply by 1.76oz (Each gel pot weighs approx. 1.76oz) = 55,062oz = 1.72 Tons
---	---	---	--

1.72 Tons of waste prevented from going to landfill

Less Carbon

The Carbon savings that EcoBurner users benefits from are certified by an independent body in the UK, Carbon Footprint Ltd. In summary their report highlights the amount of carbon emitted during a typical buffet service of three hours using different heating methods. DEG, Ethanol, Methanol gels/wicks, Induction and EcoBurner are analysed and results are as follows:

Carbon Savings Per Hour as certified by Carbon Footprint Ltd.

Product	Emissions for 8,000 hours based on "3-hour in use" scenario (kg CO2e)
Industry Standard (Ethanol)	1,928
Industry Standard (Methanol)	1,386
Industry Standard (DEG)	1,243
Induction Heater	3,864
EcoBurner	423

TYPICAL HOTEL SAVING

Key Assumptions for calculations

6 hrs. per day X 20 chafing dishes = 120 hrs. per day = 43,800 hrs. per year	Multiply by the carbon savings per hour compared to EcoBurner as certified by Carbon Footprint Ltd. 43,800 hrs. X 0.137 (Average carbon savings gels/wicks per hour) = 6,000.6kg, 6,000.6kg = 6.6 US Tons
--	--

6.6 US Tons of Carbon saved annually

EcoBurner Environmental Savings Initiative

Switching to EcoBurner helps save water, waste and carbon so we run a certification programme to recognise these savings. Venues submit the amount of EcoBurner fuel they've used instead of gels and wicks and we calculate their water, waste and carbon savings based on fuel consumption.

Email info@ecoburner.com to submit your fuel usage, we'll verify it and send you your certificate!

Less Staff Hours

When hotels use traditional water-based chafing dishes, staff need to fill the water pans, get the water to temperature and then dispose of the water at the end of service. If they switched to EcoServe or EcoPan, this unnecessary handling of water is eliminated so there is a saving of approximately 8 minutes per chafing dish.

TYPICAL HOTEL SAVING

Key Assumptions for calculations

20 chafing dishes

In use twice a day

For 3 hours each service

8 minutes per chafer X 20 chafing dishes = 160 mins.

Multiply by 2 (twice a day) = 320 mins per day = 116,800 mins per year divided by 60 = 1,947 hours per year

X

1,947 Staff Hours saved annually

WORLD ALLIANCE
for EFFICIENT SOLUTIONS

by **SOLARIMPULSE**
FOUNDATION

EcoBurner has been awarded the "Solar Impulse Efficient Solution" Label, a proof of high standards in profitability and sustainability.

Solar impulse identified 1000+ clean and profitable solutions to address environmental issues without compromising on economic growth and EcoBurner is one of them! This is thanks to the WATER and CARBON savings achieved by using the EcoBurner system instead of gel and wicks.

To receive the "Solar Impulse Efficient Solution" Label, EcoBurner was thoroughly assessed by a pool of independent experts according to 5 criteria covering the three main topics of Feasibility, Environmental and Profitability. All labelled solutions are part of the #1000solutions portfolio that are presented to decision-makers in business and government by Bertrand Piccard, Chairman of the Solar Impulse Foundation. The aim of this initiative is to encourage the adoption of more ambitious environmental targets and fast-track the implementation of these solutions on a large scale.
