BioVex[®]

DISINFECTANT

CERTIFIED ORGANIC

BioVex is certified organic, halal, & kosher. It contains no QUATS (Quaternary Ammonium Compounds) that can cause lung irritation or cancer-causing by-products like bleach.

EPA & NSF REGISTERED

BioVex is registered with the Environmental Protection Agency and the National Sanitation Foundation. BioVex is on the EPA List-N for use against Covid-19.

100% BIODEGRADABLE

BioVex breaks down into microscopic table salt after drying. It is non-toxic, non-corrosive, and leaves no residue or carcinogens behind.

HOSPITAL-GRADE

BioVex kills Staphylococcus aureus, Salmonella cholerasuis, and Pseudomonas aeruginosa qualifying it with the EPA as hospital-grade. The bacteria Pseudomonas aeruginosa hides behind biofilm and is difficult to eliminate.

PRE-MEASURED CONCENTRATE

BioVex is activated and then diluted in a fixed amount of water to produce a ready-to-use disinfectant in seconds. The pre-measured concentrate is easy and convenient to ship, store, & dilute.

NON-CORROSIVE

WHY CHOOSE BIOVEX?

BioVex provides hospitality & restaurant operators a safe and convenient system to reduce the spread of communicable infections from non-porous surfaces throughout their facilities. It can be applied by electrostatic spraying, GermBuster Fogger, coarse spraying or mopping. BioVex is non-toxic, non-corrosive & leaves no residue making it the ideal disinfectant for every environment.

BioVex®

(EPA REGISTRATION #9804-1)
CERTIFIED ORGANIC DISINFECTANT

EPA LIST N FOR USE AGAINST SARS-COV-2 (COVID-19)

BIOVEX. THE CLEANER CHOICE.

BioVex is certified organic, halal, & kosher. It contains no QUATS (Quaternary Ammonium Compounds). Quats are the active ingredient in most disinfectants manufactured by Clorox, Lysol, VitalOxide, and others. Studies have shown Quats can cause lung irritation and lead to antimicrobial resistance "super-bugs". BioVex also contains no VOC's or cancer-causing by-products like bleach.

HOW IT WORKS.

BioVex is activated and then diluted in a fixed amount of water to produce a ready-to-use disinfectant in seconds. The pre-measured 3.25oz concentrate produces 1 gallon and the 16oz concentrate produces 5 gallons of ready-to-use disinfectant. Making BioVex easy and convenient to ship, store, & dilute.

For large facilities, BioVex can be diluted automatically through the a High Volume System that delivers ready-to-use disinfectant constantly. No wiring needed. Only requires water connection.
